IDEM 2018 Press Release A. Schweickhardt GmbH & Co. KG

IDEM Singapore 2018 is calling...

and as one of the oldest German instruments manufacturers we are succeeding its call. Tired of losing time by changing the scalpel blades during a complex dental treatment with conventional methods? Afraid of injuries during the blade changing process for the dentist or his assistances?

With our fresh patented SAFE-EX such feelings are a thing of the past. The integrated function that works like a regular ball pen reduces the risk of an injury to a minimum. The blade is ejected from the SAFE-EX just by pushing the button on the distal end. The practice staff, especially during the re-processing, is safe from infections caused by unintended cuts.

With our over 120 years' experience in manufacturing dental instruments, we are happy to present such as well as other game changing innovations during the upcoming IDEM exhibition in April in Singapore.

During the exhibition we are presenting our innovations and products within the German pavilion on level 4 at booth 4k-24.

We are looking forward to welcome you on our booth!
