

By exploiting new technologies, B&B Dental is constantly evolving to help dentists with daily clinical implantological procedures. Our products are dedicated to professionals seeking a new approach to implantology and guided surgery techniques. B&B Dental has developed the instruments (implants, burrs, regenerating materials...) to help the doctors obtain long-term successful outcomes with implant therapy. Through research, B&B Dental has optimized its products and a guided surgery protocol that combines clinical technique and materials to achieve the optimal functional and aesthetical results and to provide smart solutions even in difficult and challenging cases giving the more specific diagnoses, virtual planning of surgical procedures with quicker, safer and more precise treatments. B. & B. Dental has a market web in several countries in Asia and organizes courses in its headquarters in Italy and in collaboration with its partners. During exhibition B. & B. Dental will be located in hall 4 booth 4B-11 and will be lookin for new partners and show the innovations and historic product displayed on the catalogue.
