

FOR IMMEDIATE RELEASE

GiGATT SHOWCASES PENTAX® LOUPES & ZUMAX® DENTAL MICROSCOPES AT IDEM 2018

GiGATT International Marketing Pte Ltd showcases innovative technologies that include Pentax Loupes and Zumax Dental Microscopes at 10th International Dental Exhibition and Meeting 2018.

SINGAPORE, March 15, 2018 - GiGATT International Marketing Pte Ltd, one of Singapore's reputable distributors of medical devices and technologies will showcase two innovative imaging devices, the **PENTAX®** PRISMVUE NF2 Loupes and the **Zumax®** Dental Microscopes at the 10th International Dental Exhibition and Meeting (IDEM) 2018.

The **PENTAX®** PrismVue NF2 surgical loupes offer dentists and surgeons alike, a bright, magnified view of the operation field while sitting or standing upright. The PENTAX® PrismVue loupes incorporate its proprietary deflection prisms, uniquely designed at a 48° declination angle of view. This patented design helps to eliminate or minimise cervical strain, back aches and reduces eye fatigue; common occupational hazards experienced by most dentists and surgeons. The PENTAX® PrismVue surgical loupes also enable it's users to switch effortlessly between magnified and actual sized views by simple eye movements.

This innovative range of surgical loupes is fully customisable and also accommodate users with myopia. Each PENTAX® PrismVue NF2 surgical loupe is custom-made to fit each individual perfectly to ensure exceptional performance and comfort.

The innovative **Zumax®** OMS2350 Dental Microscope has the capability to integrate FHD camera feature. This enables live streaming of real-time footage making it ideal for training and teaching purposes. The Zumax® microscopes also integrate seamlessly a six-step magnification selection (2.8x to 26x) and an articulated, balanced armature for precision and smooth workflow.

To offer maximum flexibility, the Zumax® dental microscope is highly modular with a range of adaptors that enable a selection of brands of digital camera to capture video or still shot. Users may also attach popular smartphones, both to take pictures and videos as well as to communicate with colleagues/people via live video and more.

GiGATT International Mktg Pte Ltd is pleased to exhibit, demonstrate and share more about the **PENTAX®** PrismVue NF2 surgical loupes and the new **Zumax®** dental microscope at booth No.6F-18 at IDEM 2018.
