

## **Press release - IDEM**

### **New hand disinfection system NEBUCID® HP**

Helvemed, leading manufacturer of innovative disinfection solution made in Switzerland, will introduce for the first time in Asia the new automatic hand disinfection device NEBUCID HP.

Thanks to an attractive design and a user friendly and motivating use, NEBUCID HP can be wall installed in every places where cross contamination is a critical issue.

In combination with the HP HAND PURE solution, active in only 15 seconds on most of the micro-organisms and also containing moisturizing ingredients, the NEBUCID HP is the perfect solution in the health sector but also in many other areas.

Come and visit us at IDEM 2018 on our booth 4M-01
