

## **Planmeca Emerald™ – the new crown jewel of intraoral scanning**

*The new **Planmeca Emerald™** intraoral scanner has set the bar high for capturing digital impressions. With unprecedented speed and accuracy, it represents the highest level of scanning available in the world today.*

Planmeca Emerald has been designed with premium usability in mind and provides superior accuracy and outstanding speed in all situations. Due to its small size and light weight, the scanner is very smooth to use and also comfortable for patients.

Planmeca Emerald has the flexibility to support various different workflows. With a wide range of treatment options, it offers benefits across several specialities – such as implantology, orthodontics, prosthodontics and maxillofacial surgery. The scanner's plug-and-play capability allows it to be effortlessly shared between different rooms and laptops.

Planmeca Emerald's seamless, autoclavable and exchangeable tips make infection control measures simple and efficient. The scanner's two buttons also allow it to be operated without touching a mouse or keyboard, and it can even be controlled from a foot pedal when connected to a dental unit. With open export and import options, regular updates and constant new features becoming available, the scanner continues to evolve and improve.

Planmeca Emerald is part of the **Planmeca FIT®** chairside CAD/CAM system that integrates the entire chairside restorative workflow – from scanning to designing and milling.
