AESTHETIC IS THE RESULT

IDEM 2018 PRESS RELEASE HELMUT ZEPF MEDIZINTECHNIK GMBH

Nanopal® M5 Currettes in Z-Shape Handles

With the new ZEPF M5 Gracey Currettes we introduce instruments in a new design.

The Z-Shape Relax Handle is designed according to the ergonomic needs of a curettage. The new handle as well as the delicate surfaces of the tip are coated with the new ZEPF nanopal® coating. The new ZEPF Gracey Currettes have a 0.9 mm thin, flexible and therefore very delicate 1st shaft. The curette offers a perfect adaption to deep roots. With the nanopal® coating the surface hardness is increased to 4500 Vickers – as never seen before. The blade is highly quenched and does not need to be sharpened. The M5 Currettes with nanopal® coating are also available in the ZEPF Bionik Handle.

The instrument tips are available in M4 x 0.5 mm, exchangeable.
